PROTEIN EXPRESSION AND PURIFICATION

Editor-in-Chief:
R.R. Burgess
See [editorial board](#) for all editors information

Description

The power of modern molecular genetics to provide large quantities of proteins that were previously difficult to obtain has sparked an explosion of interest in both practical and theoretical aspects of protein purification.

Example

Protein Expression and Purification is dedicated to providing a forum for information about protein isolation based on conventional fractionation as well as techniques employing various molecular biological procedures to increase protein expression.

The following types of articles are published:

- Original articles reporting novel or significantly improved isolations of highly purified proteins
- Procedures for expressing and isolating proteins from genetically engineered sources
- Novel or improved molecular biological methods for overexpression of specific proteins
- Review articles that describe advances in the expression and purification

Audience
Biochemists, biophysicists

 **Ethics in Publishing: Instructions to Authors**
For Elsevier Editorial System

This general statement will be supplemented by instructions to authors (as well as in communications to editors and peer reviewers) relevant for each journal. In case the journal is affiliated to or owned by a Society: In the event of any conflict between this statement and Society guidelines, policies or procedures, Society preference prevails.

Ethics and Procedures

General

The editor(s) and publisher of this Journal believe that there are fundamental principles underlying scholarly or professional publishing. While this may not amount to a formal code of conduct, these fundamental principles with respect to the authors' paper are that the paper should:

- be the authors' own original work, not published elsewhere
- reflect the authors' own research and not be plagiarized in any complete manner,
- properly credit the meaningful contributions of others
- not be submitted to more than one journal (under redundant simultaneous peer review), and
- be appropriately placed in the context of prior and existing research.
