Artificial Intelligence

An International Journal

Welcome to the online submission and editorial system for *Artificial Intelligence*.

Artificial Intelligence, which commenced publication in 1970, is now the generally accepted international forum for the publication of results of current research in this field. The journal welcomes basic and applied papers describing mature work involving computational accounts of aspects of intelligence. Specifically, it welcomes papers on:

- automated reasoning
- computational theories of learning
- heuristic search
- knowledge representation
- qualitative physics
- signal, image and speech understanding
- robotics
- natural language understanding
- software and hardware architectures for AI.

The journal reports results achieved; proposals for new ways of looking at AI problems must include demonstrations of effectiveness. From time to time, the journal publishes survey articles.

PROTEIN EXPRESSION AND PURIFICATION

Editor-in-Chief:
R.R. Burgess
See [editorial board](#) for all editors information

Description

The power of modern molecular genetics to provide large quantities of proteins that were previously difficult to obtain has sparked an explosion of interest in both practical and theoretical aspects of protein purification.

Example

Protein Expression and Purification is dedicated to providing a forum for information about protein isolation based on conventional fractionation as well as techniques employing various molecular biological procedures to increase protein expression.

The following types of articles are published:

- Original articles reporting novel or significantly improved isolations of highly purified proteins
- Procedures for expressing and isolating proteins from genetically engineered sources
- Novel or improved molecular biological methods for overexpression of specific proteins
- Review articles that describe an to the expression and purification

反复阅读投稿指南“the Guide for Authors”

- ü 从第一稿开始就按照 Guide for Authors 的要求写作
- ü 格式（文献的引用, 标题, 图表等等）
- ü 所有的编辑都不愿意在准备不充分的稿件上浪费时间。
这种投稿是对编辑的不尊重。

“Guide for Authors” often contains useful instructions on scientific writing.

6 Introduction

The Introduction summarizes the rationale for the study and gives a concise background. Use references to provide the most salient background rather than an exhaustive review. **The last sentence should concisely state your purpose for carrying out the study (not methods, results, or conclusion).**

9 Results

Emphasize or summarize only important observations. **Simple data may be set forth in the text with no need for tables or figures.** Give absolute values, not merely percentages, particularly for the control values.

Present your results followed by (Table 1 or Figure 2). **Do not write "Table 1 shows that" or "Figure 2 demonstrated that."**
