Conferences

Members

American Institute of Electrical Engineers

Founding officers of the American Institute of Electrical Engineers in 1884:

Thomas A. Edison

Alexander Graham Bell

The Institute of Radio Engineers

Founding member of the Institute of Radio Engineers in 1912:

Guglielmo Marconi

The image shows the front page of 'THE NAUTICAL GAZETTE', dated 'NEW YORK, WEDNESDAY, APRIL 24, 1912'. The main headline is 'Most Direful Disaster of the Deep'. Below it, a sub-headline reads 'Twelve Days from Builders' Yard to the Bottom of the Atlantic, the Great "Titanic" Foundered with Loss of 1,415 Lives'. The page contains several columns of text and two photographs. One photograph shows a ship at sea, and another shows a ship's bow. The page is framed by an orange border.

1912
Radio telegraph operators' communications with the sinking Titanic demonstrated the power of radio

AIEE + IRE = IEEE

The idea that there should be one organization for all electrical engineers was an old one, and became more powerful as the profession expanded beyond its separate roots in power and radio.

In 1962, the boards and memberships of the two institutes agreed to merge. On **January 1, 1963**, the Institute of Electrical and Electronic Engineers was born with **150,000** members.

1962

Symposium on the proposed merger, IRE National Convention

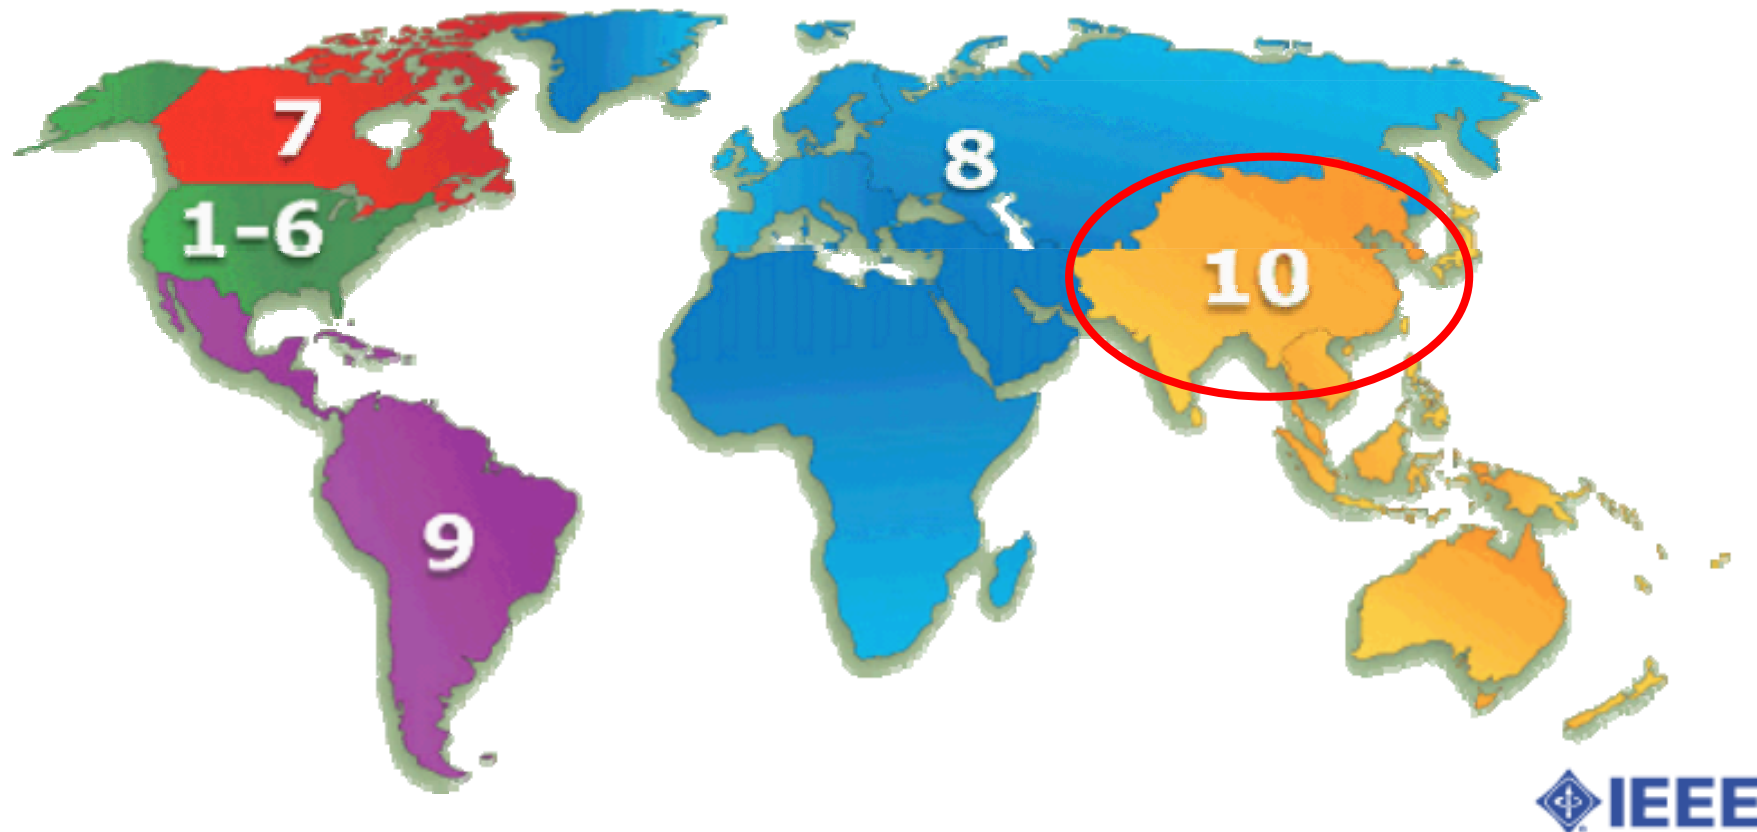

Special merger issue of the Proceedings of the IRE

The badge of the new IEEE combined the right hand rule from the IRE with the kite from the AIEE

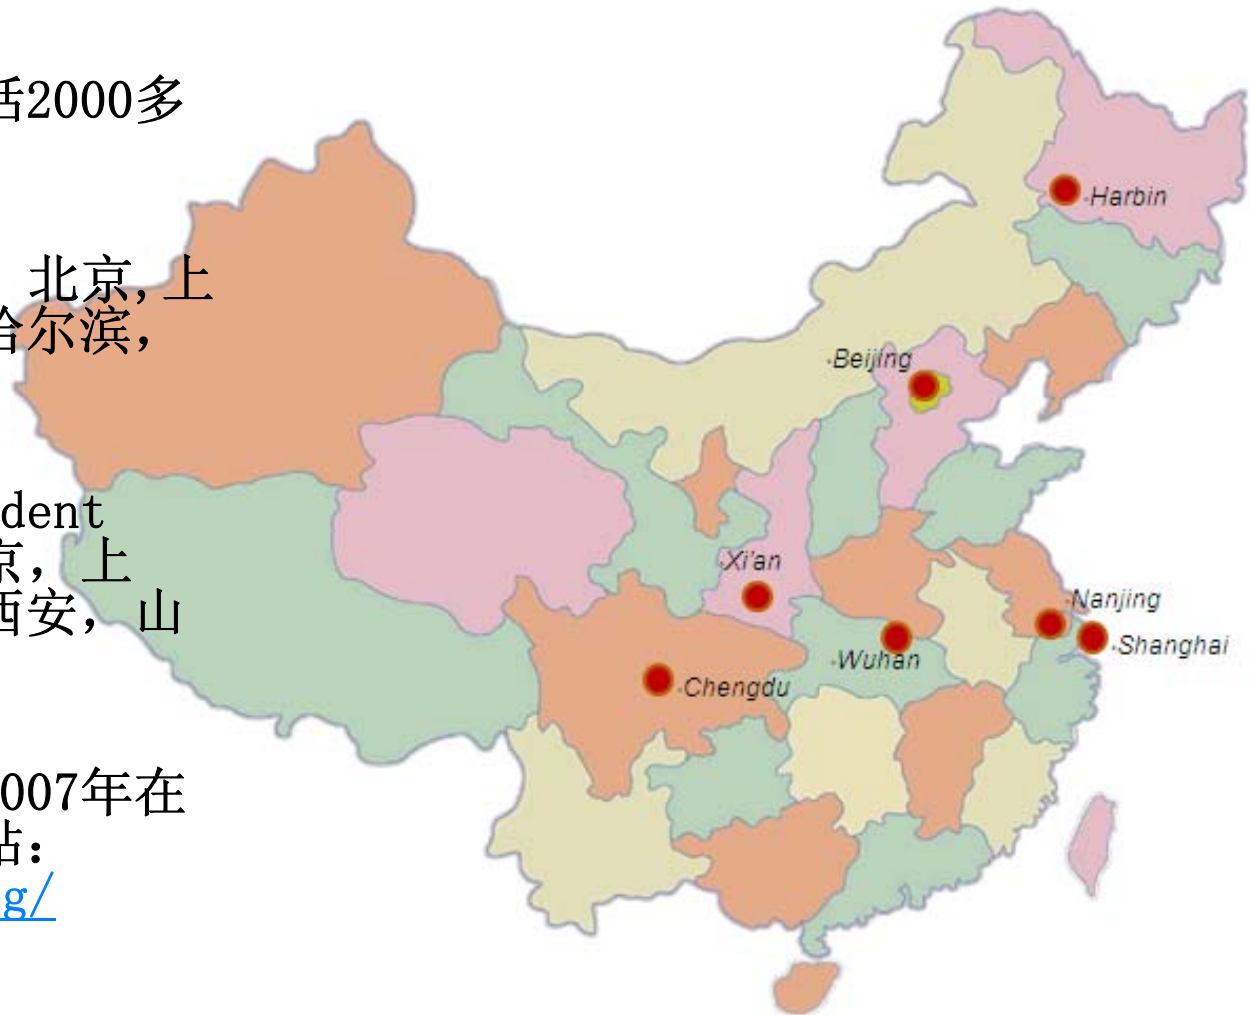

Today's IEEE

- 非盈利组织，全球最大的技术行业协会，成员遍布160多个国家地区，会员超过40万人

3 Results Returned for 'smart transducer'

■ smart transducer

A transducer that provides functions beyond those necessary for generating a correct representation of a sensed or controlled quantity. This functionality typically simplifies the integration of the transducer into applications in a networked environment.

Versions

Standards

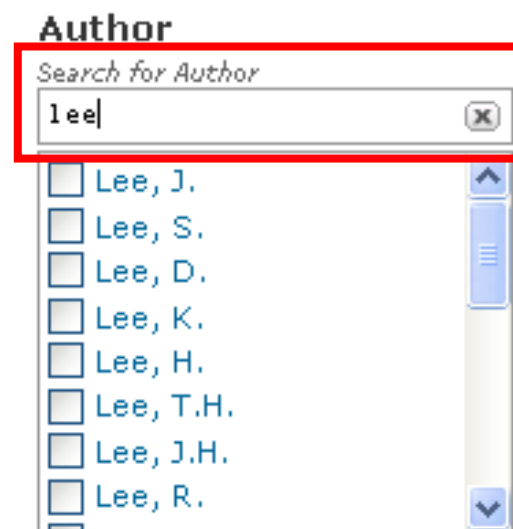

- **6LoWPAN**
 - wireless personal area network utilizing mesh networking and IPv6
- **ACK**
 - acknowledgment.
- **acknowledge**
 - A reply message used to indicate that a command or trigger message was received.
- **ACL**
 - asynchronous connectionless link.
- **actuator**
 - A transducer that accepts a data sample or samples and converts them into physical action.
- **address**
 - A character or group of characters that identifies a register, a particular part of storage, or some other data source or destination.
- **AddressGroup**
 - A collection of TransducerChannels that respond to a single address.
- **AES**
 - advanced encryption standard.
- **AP**
 - access point.

IEEE X

Yisheng Xue (M'08) received the Ph.D. degree in electronic engineering from Tsinghua University, Beijing, China, in 2002.

From August 2002 to October 2004, he was a Postdoctoral Researcher with the University of Duisburg–Essen, Duisburg, Germany. From November 2004 to June 2005, he held a research associate position with the Department of Electrical and Computer Engineering, McGill University, Montreal, QC, Canada. Between August 2005 to August 2007, he was a Senior Research Scientist with Siemens

Corporate Technology, Beijing. He was with the Motorola Labs, Beijing, between August 2007 and September 2008. Since September 2008, he has been with Qualcomm Wireless Communication Technologies, China Ltd. His research interests include protocol design and signal processing for wireless communications.

Quick
Abstract

IEEE Journal on Selected Areas in Communication (J-SAC)

- This publication focuses on all telecommunications
 - telephone, telegraphy, facsimile, and point-to-point television, by electromagnetic propagation, including radio;
 - wire;
 - aerial, underground, coaxial, and submarine cables;
 - waveguides, communication satellites, and lasers;
 - in marine, aeronautical, space, and fixed station services;
 - repeaters, radio relaying, signal storage, and regeneration;
 - telecommunication error detection and correction;
 - multiplexing and carrier techniques;
 - communication switching systems;
 - data communications;
 - and communication theory

IEEE Journal on Selected Areas in Communication (J-SAC)

- J-SAC publishes only papers that are submitted in response to a **Call-for-Papers** in J-SAC issues and other publications of the IEEE Communications Society as appropriate to the subject area of the call.
- Papers submitted for review for possible publication in a J-SAC issue must be submitted to one of the **Guest Editors listed in the Call-for-Papers.**

CALL FOR PAPERS

IEEE Journal on Selected Areas in Communications

Broadband Wireless Communications for High Speed Vehicles

- Novel network architecture
- Satellite communications
- Drive-through Internet
- Distributed antenna systems and radio over fiber for vehicle-to-infrastructure communications
- High speed vehicle-to-vehicle communication
- BWC for high speed vehicle control systems
- Radio resource allocation to high speed vehicles
- Fast and reliable handover and random access schemes
- Wireless channel modeling and estimation
- Effects of Doppler spread
- Modulation schemes for high speed vehicles
- Antenna array and MIMO
- Prototype and field tests

Guest Editors:

Prof. Yiqing Zhou, Advanced Wireless Center, ICT/CAS, China (zhouyiqing@ict.ac.cn)

Prof. Fumiyuki Adachi, Tohoku University, Japan (adachi@ecei.tohoku.ac.jp)

Prof. Xiaodong Wang, Columbia University, USA (wangx@ee.columbia.edu)

Prof. Athanassios Manikas, Imperial College, United Kingdom, (a.manikas@imperial.ac.uk)

Prof. Xi Zhang, Texas A&M University, USA (xizhang@ece.tamu.edu)

Prof. Wei-Ping Zhu, Concordia University, Canada (weiping@ece.concordia.ca)

Graphic Files

- Any line art, graphs, charts, drawings, tables, and photographs will be treated as a graphic for final production.
- All line drawings and photos should be in black and white
- The current cost for color reproduction is a flat printing fee of US\$1,045.00 (4 pages or less with color) plus US\$62.50 per piece of color artwork.

Multimedia Materials

- General instructions for the [preparation of multimedia materials](#) (PDF, 268 KB)
- Instructions for the [creation of a README file for datasets](#). (PDF, 72 KB)
- Instructions for the [creation of a README file for playable objects](#). (PDF, 72 KB)
- A playable file of some sort, such as a video clip or a sound file.
- A data set, where the author has provided raw data, possibly along with some sort of program to help viewers of the article manipulate and analyze the data.

Paper Length

- No longer than **20 double-spaced pages** (12-point font, approximately 26 lines per page with 6.5-inch line length) excluding figures.
- Each manuscript must be accompanied by **index terms and a 75- to 200-word abstract** clearly outlining the scope and contributions of the paper.
- Mandatory over-length page charges of **\$220.00 for each journal page exceeding 7 printed pages**

IEEE Mini-Grants and Student Application Papers

- SEC is offering Mini-Grants to students and faculty mentors
- Help with graduate and undergraduate last-year design projects that contain an industry standards component
 - \$500 grants for students
 - \$300 grants for faculty advisors

Final student papers are now posted on the following topics:

- Applications of IEEE 802.11b Wireless Standards in the Realization of a New Service Paradigm for New Jersey's Garden State Parkway
- Dynamic Backoff for IEEE 802.15.4 Beaconless Networks
- Wireless Body Area Networks for Healthcare: A Feasibility Study
- Wireless Wearable Motion Sensor for Use in Medical Care
- Environment Temperature Control Using Modbus and RS485 Communication Standards
- Wireless Telemedicine as Part of an Integrated System for E-medicine
- Build an IEEE 802.15.4 Wireless Sensor Network for Emergency Response Notification for Indoor Situations

Title: Guide for **Smart Grid** Interoperability of Energy Technology and Information Technology Operation with the Electric Power System (E) Applications and Loads

Status: New Standard Project

Technical Contact: Richard DeBlasio, Phone:303-275-4333, Email:dick_deblasio@nrel.gov ** For non-technical questions, including pricing, ordering, please contact IEEE Customer Service at 1-800-878-IEEE (in the U.S. and Canada), or 1-732-981-0060 (outside the U.S. and Canada) email to customer-service@ieee.org.

History: PAR APP: Mar 19, 2009

Project scope: This document provides guidelines for **smart grid** interoperability. This guide provides a knowledge base addressing terminology, characteristics, functional performance and evaluation criteria, and the application of engineering principles for **smart grid** interoperability with the electric power system with end use applications and loads. The guide discusses alternate approaches to good practices for the **smart grid**.

Project purpose: This standard provides guidelines in understanding and defining **smart grid** interoperability of the electric power system with end use applications and loads. Integration of energy technology and information and communications technology is necessary to achieve seamless electric generation, delivery, and end-use benefits to permit two way power flow with communication and control. Interconnection and integration frameworks and strategies with design definitions are addressed in this standard, providing guidance in expanding the current knowledge base. A knowledge base is needed as a key element in grid architectural designs and operation to promote a more reliable and flexible electric power system.
